## About me

Passionate Frontend Developer with strong expertise in React.js, JavaScript, and modern web technologies. Coding has been my dream since childhood, and I am continuously working to turn that passion into professional excellence. Currently enhancing backend skills with Node.js & Express.js through the Full-Stack Web Development course at (SMIT) to become a complete Full-Stack Developer. Dedicated to building user-friendly, scalable, and impactful web applications.

## Education

Intermediate 2024-2026

- Intermediate in **Computer Science** from Govt.National College (in Progress).

Matriculation 2021-2023

- Matriculation in Science from Karachi Board.

## Other Courses:

Ms Office & Inpage

English & Urdu Typing

## Interests

## Technical Skills

### Frontend Development:

- HTML5, CSS3, JavaScript (ES6+)

### React.js

- (Vite, Hooks, Context API, React Router, State Management)
- Redux Toolkit (state management for scalable apps)
- TanStack Query (React Query) (API data fetching & caching)
- Tailwind CSS, Bootstrap (responsive UI design)

### Backend Development (Learning / In Progress):

- Node.js (Basics)
- Express.js (REST APIs, Middleware)

### Databases:

- Firebase (Authentication, Firestore, Realtime Database, & Crud)
- Supabase (Basic Knowledge)
- MongoDB (JWT, Crud)

### Version Control:

- Git & GitHub

### Other Tools & Skills:

- Responsive Web Design
- API Integration
- Problem Solving & Debugging

## Some React and Mern Projects

### E-Commerce Style Web (Admin & User Dashboards + CRUD )

- Built a small-scale e-commerce style website with two separate dashboards—Admin and User.
- Admin can manage products using full CRUD (Create, Read, Update, Delete) functionality, while users can browse, view details, and interact with products. Focused on authentication, protected routes, and real-time data updates.

### AirForShare Clone – Text & Image Sharing Web App

- Developed a clone of AirForShare enabling users to quickly share text notes and images across devices. Implemented fast input handling, device-to-device syncing logic, and a clean, distraction-free UI for easy sharing.

### OLX Clone

- Developed a fully functional OLX-style classified ads platform where users can create accounts, post advertisements, upload images, browse categories, and manage their listings. Implemented responsive UI, dynamic filtering, and ad management features using modern web technologies.
